

e-Invoice system

TOMAS TECH CO., LTD.

Introducing e-Invoice system

| What's e-Invoice system?

It's one of the modules of the package system PEGASUS. An electronic invoice system that can be used for delivery to end users. By digitizing Invoices, Delivery Orders, and Delivery Notes, it's possible to achieve "**Improvement in workability**" and "**Paperless**". We support customer's digitalization.

| Benefits of the e-Invoice system

By utilizing the e-Invoice system, it is possible to solve various problems and obtain effects.
It does a very heavy role in achieving digitization.

Inefficient work

By managing with paper, it takes time to "collect", "organize", and "analyze" information.

- Printing of paper data from data
- Classification of paper data by delivery destination
- Arrangement and sorting of paper data after signing
- PDF scanning and storage of paper data

Management cost

By managing with paper, "cost" is created.

- Paper for printing data
- Printing machine, ink fee
- Storage area and equipment for managing paper

Black boxing business

By managing with paper, the business situation is not visualized.

- It's doesn't know the delivery status.
- The delivery route is not visualized.
- The work related to delivery has become a personalized person, and the work cannot be leveled.

Improvement of business efficiency

By digitizing, it is possible to reduce management man-hours and realize efficient "collection", "organization", and "analysis".

- Devices (PC, smartphones, tablets)

It is possible to view and modify the data from.

- The system can automatically classify by delivery destination.
- Signed data can be managed for each customer.
- As PDF data, in-house and end

Can be shared with users.

Reduction of management costs

By digitizing, "cost" can be reduced by reducing the management man-hours.

- Printing man-hours can be reduced because printing is not required. Paper fee, printing machine, ink fee, printing labor cost
- No need for storage area or equipment to manage paper

Visualization of business

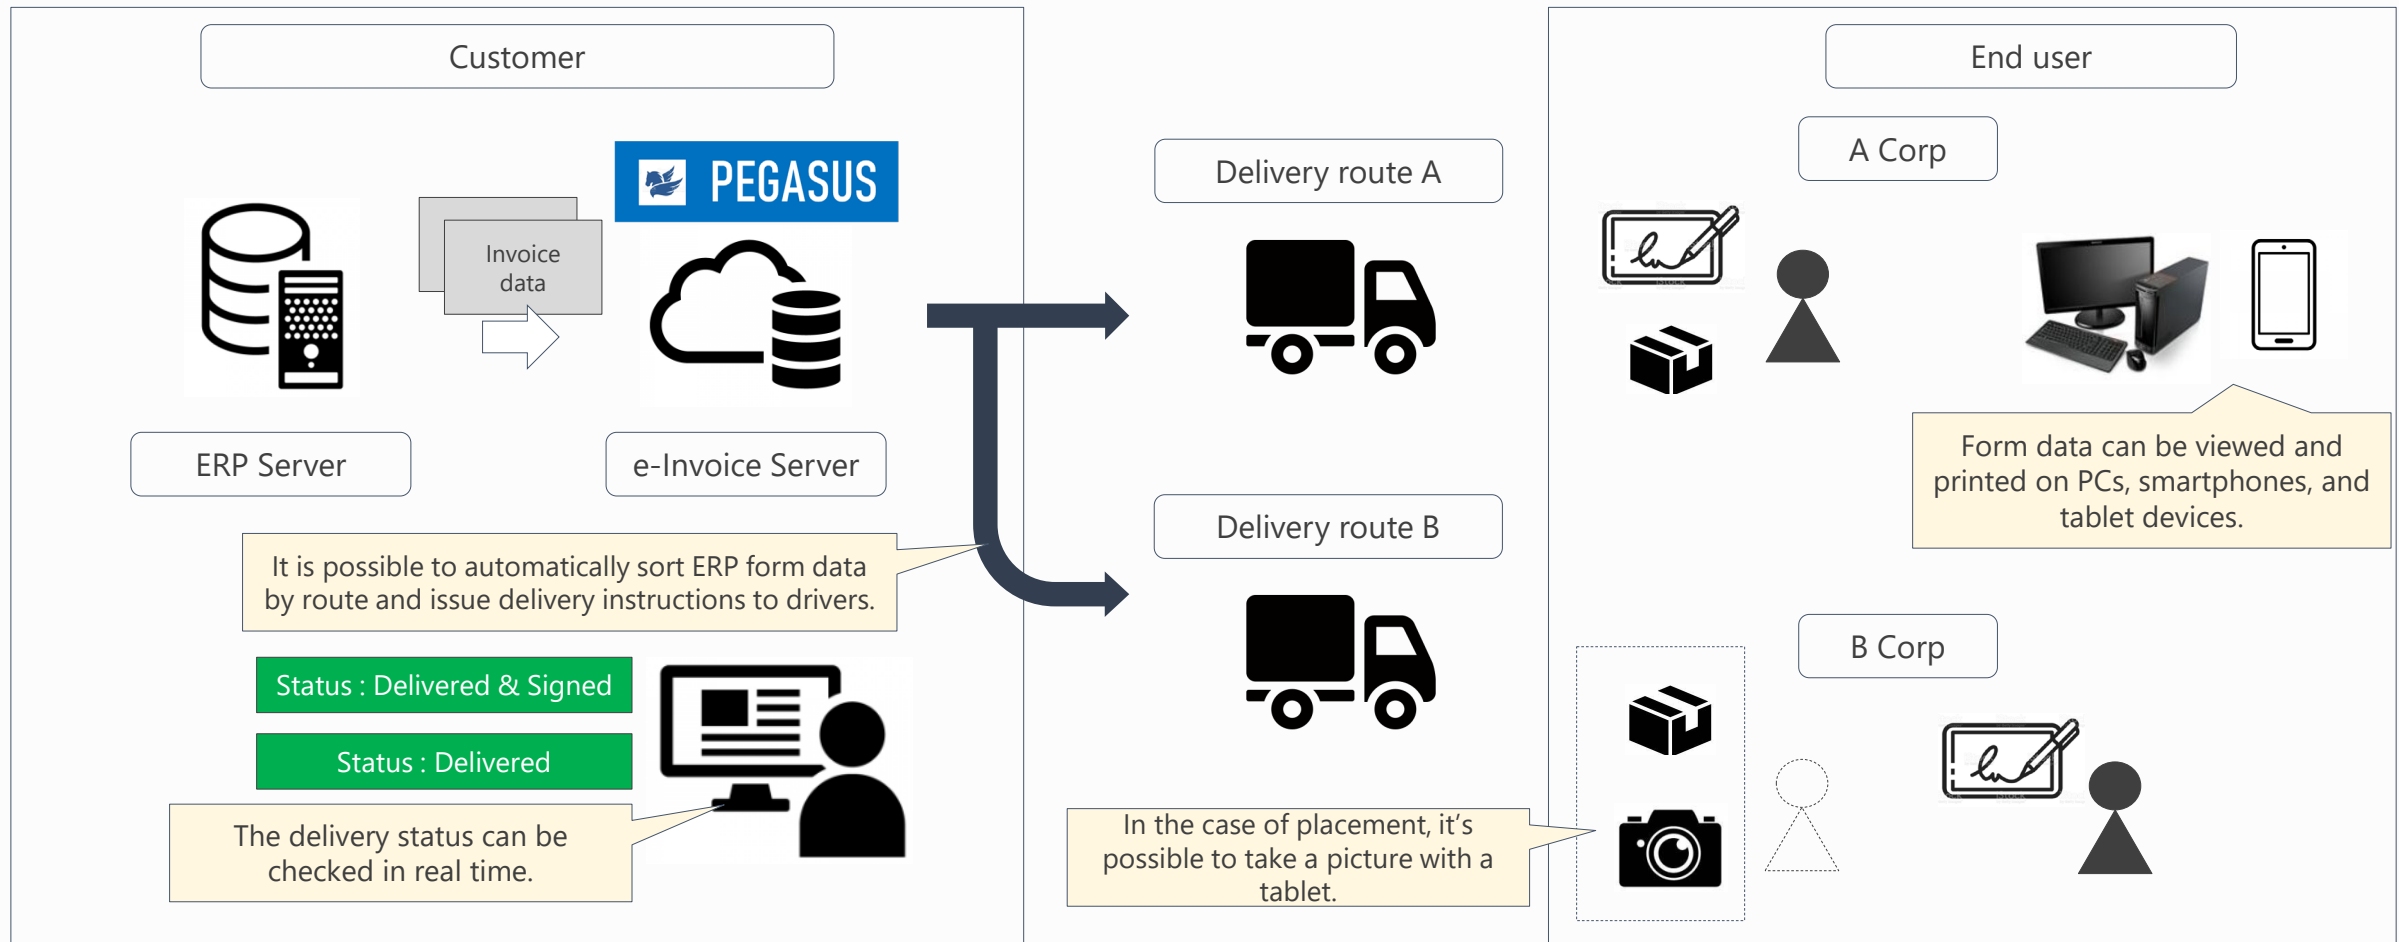

By digitizing, the business situation is visualized.

- It can check the delivery status in real time.
 - Daily delivery routes are recorded.
 - Who by semi-automating the work with the system
- However, it is possible to carry out work with the same quality.

Function of e-Invoice system

e-Invoice system configuration diagram

The e-Invoice system enables information access in various ways by having a server in the cloud. Since it supports operations such as deferred delivery, the system can be combined with the delivery operation that suits each customer.

e-Invoice system function list

Link with ERP	<p>It is supposed to be automatically linked with the ERP system. The file formats are EXCEL, CSV, TXT, XML.</p> <p>*Standard-Customize</p>
Cloud environment	<p>We support various cloud environments such as AMAZON AWS and Google Cloud Platform.</p> <p>*Standard</p>
Sign function	<p>Since it supports freehand sign and image sign forms, various sign methods can be adopted depending on the situation.</p> <p>*Standard</p>
OTP certification	<p>Since the One Time Password function is adopted, it is possible to operate with enhanced security.</p> <p>*Standard</p>

Form issuing function	<p>By inputting the necessary data to the form from ERP, you can output forms in various formats such as "invoice", "Delivery Order", and "Delivery Note".</p> <p>*Standard-Customize</p>
Camera shooting function	<p>Images taken with smartphones and tablets can be stored.</p> <p>*Standard</p>
Status management	<p>By managing the status, you can grasp the delivery status in real time.</p> <p>*Standard</p>
Management of other bases	<p>By linking data with other bases, the system can be used in multiple warehouses.</p> <p>*Option</p>

e-Invoice system Function

Link with ERP

It is supposed to be automatically linked with the ERP system. The file formats are EXCEL, CSV, TXT, XML.

PC screen

The screenshot displays the PEGASUS e-Invoice system interface. The top navigation bar includes 'Invoice', 'Master Management', 'User Name: Administrator', and 'Logout'. The main area is titled 'Invoice list' and features a search bar with filters for 'Invoice date', 'Group', 'Route', 'Type', and 'Status'. Below the search bar are buttons for 'Search', 'Clear', 'D/L PDF', 'Import', 'Confirm', and 'Delete'. A table of invoices is shown with columns for Invoice date, Invoice no, IV type, Order no, Customer code, Customer name, Group, Route, Type, Status, Short ship, and Photo. The table contains 19 rows of data, including invoice details and status updates.

#	Invoice date	Invoice no	IV type	Order no	Customer code	Customer name	Group	Route	Type	Status	Short ship	Photo

e-Invoice system Function

OTP certification

Since the One Time Password function is adopted, it is possible to operate with enhanced security. By linking with an external tool such as Google Authenticator, you will be asked to confirm and enter the OTP issued every 30 seconds. It cannot log in without the user ID / Password / OTP.

The image shows the PEGASUS login interface. At the top, the PEGASUS logo is displayed. Below it, there is a login form with two input fields: 'Email' and 'Password'. The 'Email' field contains the text 'admin'. The 'Password' field is masked with four dots. To the right of the password field is an eye icon for toggling visibility. Below the input fields are two buttons: 'Sign In' (blue) and 'Cancel' (white). At the bottom center of the screen is a yellow circular icon with a white padlock.

The image shows the PEGASUS OTP Verification screen. At the top, the PEGASUS logo is displayed. Below it, the title 'OTP Verification' is shown, followed by the instruction 'Enter 6 digits OTP display on MFA applications'. There is a row of six input boxes for the OTP digits; the first box contains a vertical line. Below the input boxes is a blue 'Confirm' button. At the bottom left is a QR code. To the right of the QR code, the text reads 'Multi-Factor Authenticator apps' and 'Go to Play store > Search Google Authenticator'. At the bottom center of the screen is a yellow circular icon with a white padlock.

Case study of introduction effect

| Introduction of case study

The analog business centered on "paper forms" has been renewed with the e-Invoice system.

Since it was mainly managed by paper, it was a lot of analog work, and it took a lot of man-hours. By realizing the conversion of forms into data, we were able to realize a significant reduction in man-hours.

Issue

- Because the work was highly personal, the site was confused by the sudden leave of the person in charge.
- Due to the loss of paper and distribution mistakes, rework occurred and it took a lot of man-hours to deal with it.
- The daily delivery status became a black box, and the progress could not be grasped.

Solution

- All business work related to delivery can now be realized within the system.
- All the forms used in business have been converted into PDF so that they can be converted to PDF from the system.
- When there is progress for each delivery, the progress is managed by changing the status.

Effect

- By using the system, we were able to standardize the work, which made it possible for employees to share the work.
- Because the form could be converted into data, human error could be reduced and man-hours could be reduced.
- Since the status can be monitored in real time, the delivery status can be visualized.

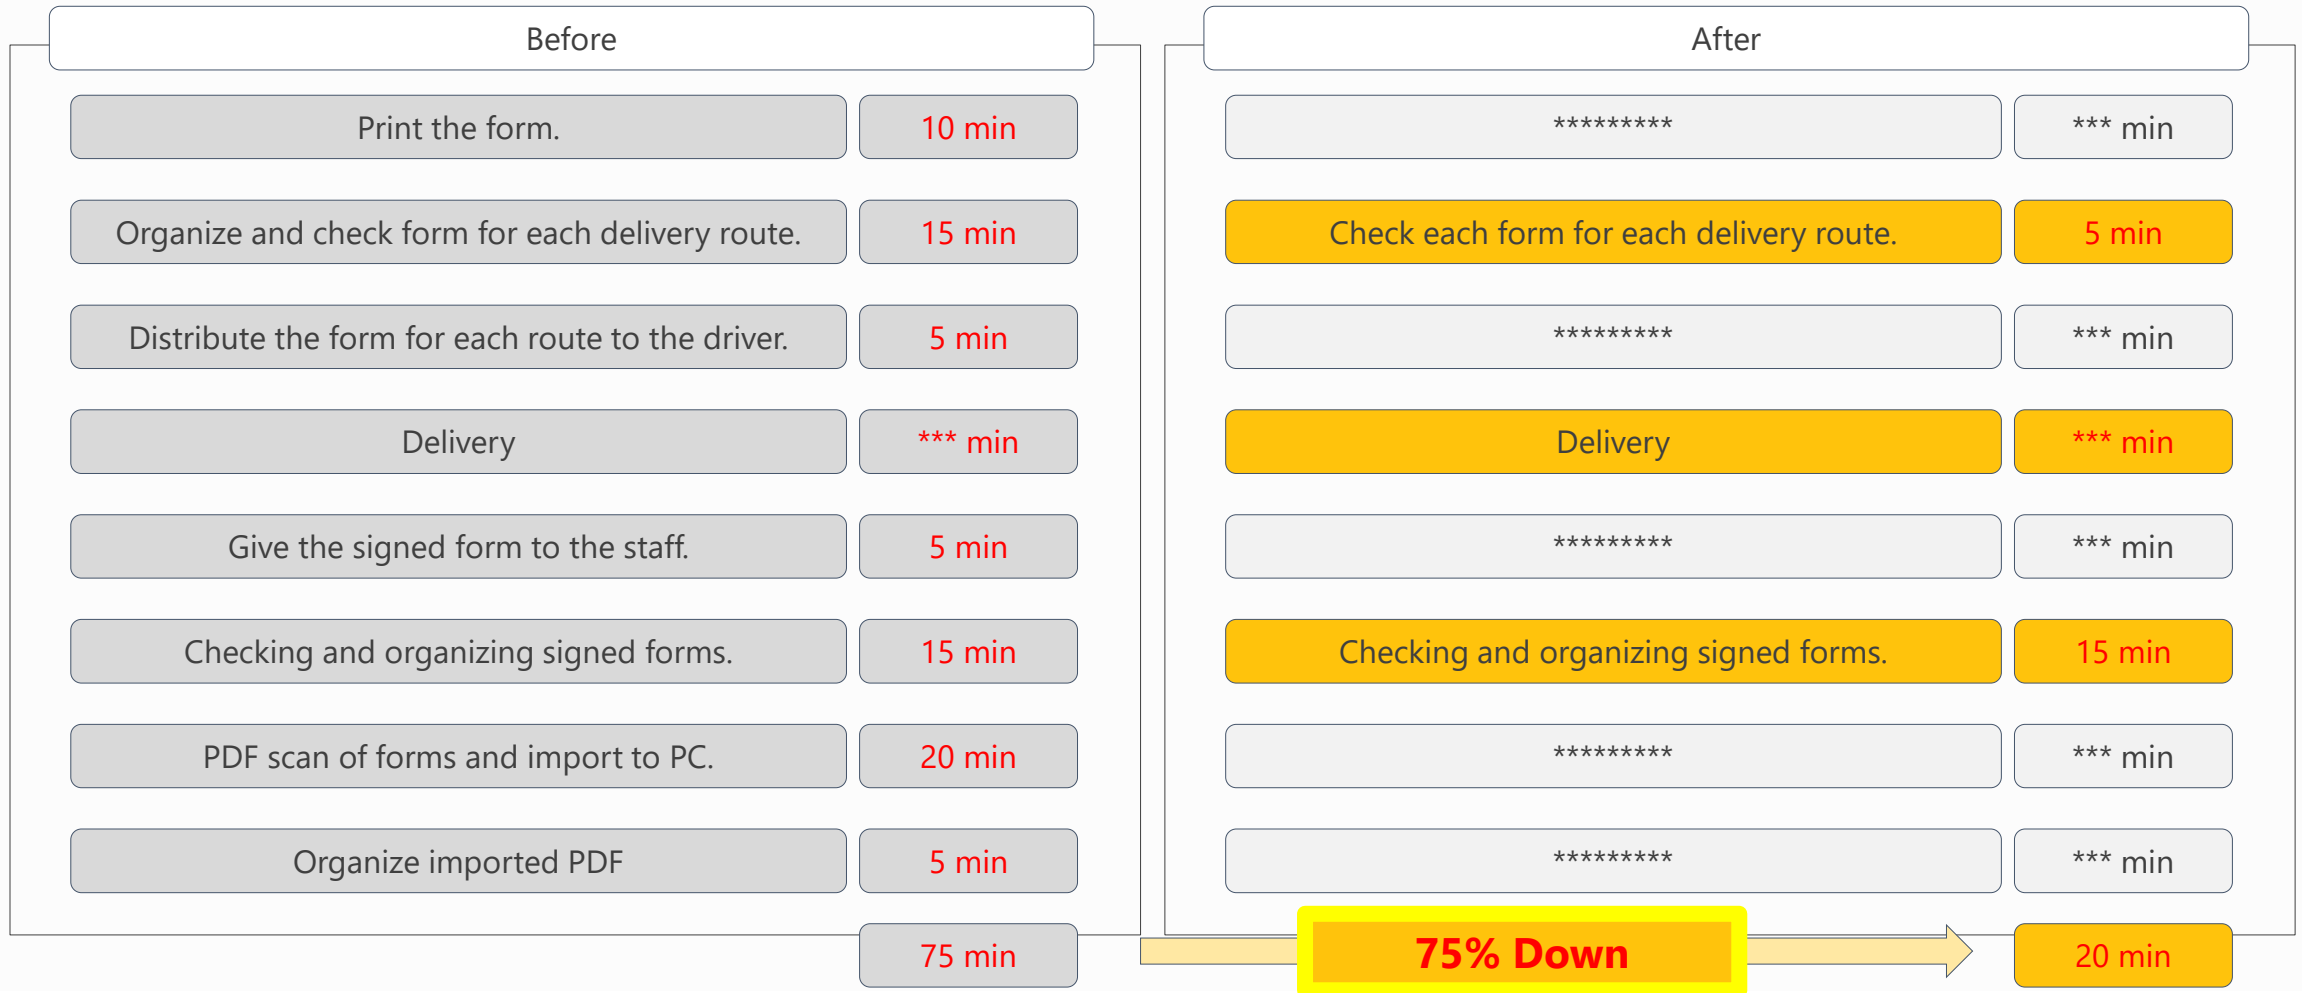

Country	Singapore
Scale	51-500 employees
Type of Industry	Food logistics company
Purpose / Effect	Reduction of work man-hours

Introduction of case study

By using the e-Invoice system, the burden of office work is reduced.

It has become possible to **reduce the time required for office work before and after delivery by up to 75%.**

Appendix

| System configuration

No	Item	Recommended specifications and models
1	Cloud Server for AWS, Google	OS: Windows Server 2016R2 Standard / Memory: 8GB or more / Hard disk: Free space 50GB or more / Display: Resolution 1366 x 768 or more / Browser: Google Chrome (latest Ver) * Server machine with recommended model specifications or more
2	Client PC	OS: Windows 7 / 8.1 / 10 / Memory: 4GB or more / Display: Resolution 1366 x 768 or more / Browser: Google Chrome (latest version) * PC machine with recommended model specifications or higher
3	Zebra ET56 Tablet PC LTE	Android OS type

| Maintenance

#	Software maintenance		Standard / Option
1	Operation support / recovery support	We will open a support window and provide operational support by phone and email, and recovery support in the event of a software failure.	Standard*1
2	Upgraded software provided	We will provide an upgraded version when the software functions are improved. We provide the latest software compatible with the latest OS free of charge. It can reduce your life cycle cost by eliminating the need to purchase software when updating the server.	Standard*1
#	Software re-setup		
1	Software re-setup	If it need to re-set up the software after repairing a server failure Perform restoration work. (Repair of inventory data is not included in software re-setup)	Standard*1

* 1) Service is provided at the system purchase fee in the first year of the contract. Contract on a yearly basis from the second year onwards

| Schedule | Go live schedule

1. Current situation analysis	We will inspection the current business and the system being used, confirm the requirements, and analyze the customer's current situation. And will make an estimate based on customer requirements.	Within sales
▼		
2. Requirement definition	Detailed requirement definition will be performed based on the analysis result. Check the detailed requirements so that the system can be implemented in a manner that matches actual operation.	1-4 weeks
▼		
3. Design	While a process meeting, we will perform basic design, detailed design, and preparation for transfer based on the requirements.	1-3 weeks
▼		
4. Development / Test	Perform the test that fits with customer work and start the test. We will consider a transfer every method for let smooth working process.	1-20 weeks
▼		
5. Introduction support	We will have an operation training to introduce the system that is currently being used or work in parallel with the work, and after confirming the usability, etc., And the final acceptance will be continue to process.	1 week
▼		
6. Production operation	When start operation. We will provide a long-term support for safe and comfortable system by providing operation maintenance support, information provision, and revision edition.	Min : 4 weeks Max : 28 weeks
