

Projection Picking System(PPS)

Picking instructed by image indication

Product introduction video

Example video for FA operation

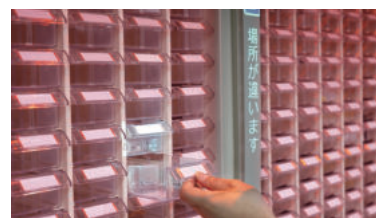

Picking system is utilized by projector. Ideal for storage shelves where the location is so small that light module can not be installed or the location changes frequently. It can also be used for FA operation as support for assembly work. Pokayoke is realized by sensor and image recognition technology. Various information displays are possible.

Projecting images to the location of picking

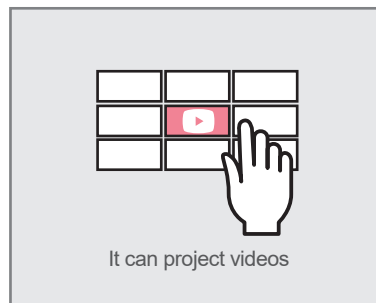

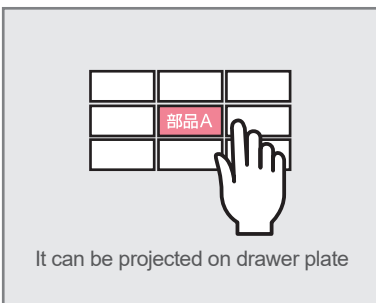

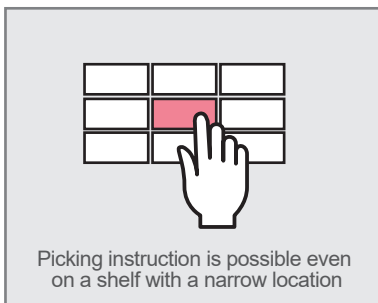

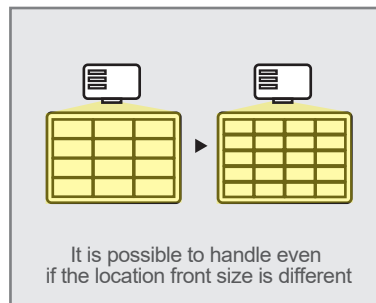

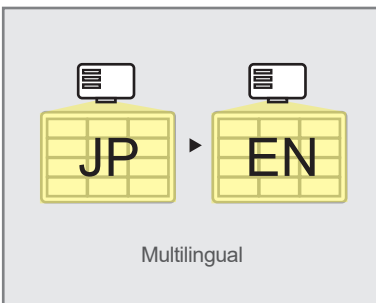

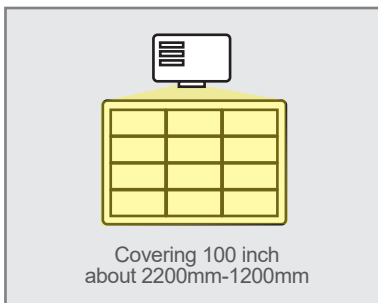

Picking from a glowing place

If you make a picking mistake . . .

Features

※Speech synthesis is optional.
